PRAJWAL A

Software Developer | Full Stack (Node.js, React, Python)
Bengaluru, Karnataka | +91 74838 10079 | prajwalshetty4552@gmail.com
linkedin.com/in/prajwal4552 | github.com/praju4552 | praju4552.github.io

SUMMARY

Software developer and ECE graduate (2026) with **10 months of production experience**: sole developer of a live e-commerce platform and maintainer of a second live platform, covering APIs, databases, payments, CI/CD and production support. Also built an AI capstone with computer vision and a local LLM. Looking for entry-level software, backend or full-stack roles.

EXPERIENCE

Full Stack Developer Intern | *PulseWriteX Solutions Pvt. Ltd., Bengaluru (Hybrid)* Feb 2026 – Present

- Sole developer of **PulseX** (pulsewritexsolutions.com), a live ordering platform for PCB fabrication, 3D printing and laser cutting that replaced a fully offline quotation and order process.
- Built the backend end to end: REST APIs in **Node.js/Express**, a **MySQL** schema with **Prisma ORM**, Google OAuth and email login, and **Razorpay** payments (UPI, net banking, cards).
- Built a custom **Gerber file viewer** that renders PCB designs with **0.1 mm dimensional accuracy**, plus a 360° 3D model viewer so customers can check designs before ordering.
- Hardened a second live platform (**Rizzo Education**, AI learning): clustered deployment with **PM2 behind Nginx**, versioned database migrations, automated backups, rollback procedures and a gated **GitHub Actions CI/CD** pipeline.
- Sized and set up the production VPS from a 100–200 user load estimate; monitor logs and fix production bugs on Linux; **100+ production commits** across both platforms.

PROJECTS

Omni Room Management System – AI Smart Classroom | *Capstone* Nov 2025 – Mar 2026

React · Node.js · Python · OpenCV · Ollama · Raspberry Pi 4

- Web platform with **4 user roles** (student, teacher, principal, office) connecting a live Raspberry Pi camera stream, a Python face-recognition service and an offline LLM assistant.
- Face-recognition attendance after benchmarking **5 approaches** (HOG + CNN chosen); **Echo Minds** LLM module on **Ollama** generates summaries, quizzes, flashcards and mind maps from lecture audio and documents.

Smart Attendance System – On-Device Face Recognition | *Python · Flask · OpenCV · Raspberry Pi*

- On-device recognition with CSV/Excel attendance export, live **Flask** MJPEG preview and **systemd** autostart.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, Java, C
Frontend: React, HTML5, CSS3
Backend: Node.js, Express, REST APIs, authentication (Google OAuth), Razorpay integration, Flask
Databases: MySQL, PostgreSQL, Prisma ORM, schema design, migrations
DevOps: Linux, Nginx, PM2 (cluster mode), GitHub Actions CI/CD, Git, backups & rollback
AI: OpenCV, face_recognition, Ollama (local LLMs)

EDUCATION

B.Tech, Electronics and Communication Engineering | *Dayananda Sagar University, Bengaluru* 2022 – 2026
